

Stem Cell Transplantation and Cellular Therapy

Who we are

- Foundation for Accreditation of Cellular Therapy (FACT) accredited
- One of the largest centers in the world for stem cell transplants, performing more than 800 procedures each year
- Our clinical research translates scientific advances directly into patient care
- Integrated, multidisciplinary care

What we do

- Related, haploidentical and unrelated donor transplants as well as cord blood transplants for the management of
 - Malignant diseases
 - › leukemia
 - › lymphoma (Hodgkin and non-Hodgkin)
 - › myelodysplasia
 - › myeloproliferative syndromes
 - › multiple myeloma
 - › myelofibrosis
 - › testicular cancer and select solid cancer
 - Non-malignant disorders
 - › Aplastic anemia
 - › Hemoglobinopathies, including sickle cell anemia
 - › Immune deficiency disorders
 - › Autoimmune diseases, including scleroderma and multiple sclerosis
 - › Inborn errors of metabolism
- More than 50 clinical trials, including immunotherapy, vaccines and targeted therapy
- Clinical trials for patients up to age 75

Why refer to us

- Over 35 years of experience
- Multilingual team to better communicate with you and your patients
- Advanced cell processing lab to ensure safe and effective tissue transplantation
- Outpatient and early discharge programs for eligible patients
- Survivorship care
- Enhanced recovery program for older adults
- Immune cell therapy program with CAR T cells and NK cells

Fellowship program

We offer an intensive one-year fellowship designed to prepare physicians for academic careers in bone marrow transplantation and stem cell therapy.

Our fellows develop the clinical skills and understanding necessary to become an outstanding care provider and also gain research skills that will allow them to perform independently in an academic, clinical or laboratory setting.
